

Shaping Europe's Green Industrial Future: AMIGDALA Workshop on Decarbonization & Circularity

- [AMIGDALA Hosts Key Workshop on Transformative Pathways for Industrial Sustainability](#)
- [The workshop provides a valuable opportunity for industry leaders, policymakers, and experts to connect and collaborate on innovative strategies for industrial decarbonization and circularity in Europe.](#)

Amsterdam (The Netherlands), March 12, 2025. The [AMIGDALA project](#), a Horizon Europe research and innovation project, is set to host the **Comprehensive modelling of transformative pathways for European industrial decarbonization and circularity – Workshop to design key dimensions** workshop on **March 14, 2025**, from 09:30 AM to 12:30 PM CET at *Silversquare Europe*, Brussels.

As Europe advances towards its 2050 carbon neutrality and circularity objectives, the AMIGDALA project is actively contributing to the transformation of the industrial sector. The workshop hosted in Brussels will bring together industry leaders, policymakers, and sustainability experts to exchange insights and strategies.

The AMIGDALA project is developing a Digital Twin framework designed to enhance decision-making processes for industrial decarbonization. This workshop will provide a structured platform for participants to contribute expertise, explore advanced scenario modeling methodologies, and engage with a proof-of-concept model.

Featured Speakers:

Frank Wubbolts (TNO), Wouter Nijs (VITO), Fabio Rosada (GreenDecision), Joel Neave (Deloitte), Damien Rolland (DECHEMA) and Stefan Luxembourg (TNO)

The workshop will conclude with a networking lunch, allowing attendees to make connections, exchange ideas, and establish strategic collaborations in the field of industrial decarbonization and circularity.

This exclusive in-person event is free of charge.

Comprehensive modelling of transformative pathways for European industrial decarbonization and circularity – Workshop to design key dimensions

March 14, 2025,

09:30 AM to 12:30 PM CET

Silversquare Europe Square de Meeûs 35, 1000 Brussels, Belgium.

AMIGDALA

About AMIGDALA

AMIGDALA aims to achieve impact by providing European legislators and industries insights into the interaction between regulatory action and the global industrial investment response. This innovative approach thus drives sustainability while it considers strategic positioning, global competitiveness and resilience. Led by the research centre TNO (The Netherlands), the AMIGDALA project is formed by BFI, the Catholic University of Leuven, DECHEMA, Deloitte, ENEA, European Research Services, GreenDecision, IIASA, SITECH, Sustainable Innovations, and VITO. The AMIGDALA project has been programmed under the Process4Planet partnership and is supported by the European Union under the Grant Agreement number 101138534
